node-red
Your environment has been set up for using Node.js 18.12.0 (x64) and npm.
C:\Users\Welcome>cd C:\Program Files\nodejs
C:\Program Files\nodejs>npm install -g --unsafe-perm node-red
npm WARN deprecated @types/keyv@4.2.0: This is a stub types definition. keyv provides its own type definitions, so you do not need this installed.
added 292 packages, and audited 293 packages in 1m
39 packages are looking for funding
run `npm fund` for details
5 vulnerabilities (4 low, 1 moderate)
To address issues that do not require attention, run:
npm audit fix
To address all issues (including breaking changes), run:
npm audit fix --force
Run `npm audit` for details.

node-red

Your flow credentials file is encrypted using a system-generated key.
If the system-generated key is lost for any reason, your credentials
file will not be recoverable, you will have to delete it and re-enter
your credentials.
You should set your own key using the 'credentialSecret' option in
your settings file. Node-RED will then re-encrypt your credentials
file using your chosen key the next time you deploy a change.
