## Checking Data

The screenshot displays the IBM Watson IoT Platform interface. The top navigation bar includes 'Browse', 'Action', 'Device Types', and 'Interfaces'. The main content area shows a device named 'deviceid12nkr' with a status of 'Disconnected'. Below this, the 'Recent Events' tab is active, displaying a table of live data events. The table has four columns: 'Event', 'Value', 'Format', and 'Last Received'. Five events are listed, each with a value object containing 'Temperature' and 'Humidity' data. A status message at the bottom indicates '1 Simulation running'.

Event	Value	Format	Last Received
event_1	{"Temperature":96,"Humidity":10}	json	a few seconds ago
event_1	{"Temperature":32,"Humidity":23}	json	a few seconds ago
event_1	{"Temperature":8,"Humidity":3}	json	a few seconds ago
event_1	{"Temperature":85,"Humidity":21}	json	a few seconds ago
event_1	{"Temperature":88,"Humidity":41}	json	a few seconds ago

1 Simulation running
